4. Click on the space and the plate number will appear in the vehicle details in the Engineering Console.

The screenshot shows the 'RO Garage - Level 3' interface. On the left is a 'SITE STRUCTURE' table with columns for level, percentage, and three numerical values. The main area displays a floor plan for Level 3 with various colored zones (red, green, blue) and a central circular structure. On the right, a log shows timestamps and system identifiers.

| Level | Percentage | Value 1 | Value 2 | Value 3 |
|-------------|------------|---------|---------|---------|
| River Oaks | 43% | 465 | 1086 | 621 |
| RO Garage | 43% | 465 | 1086 | 621 |

5. Click on the Action Tab under Modules and the click on Load Picture.

The screenshot shows the 'MODULES' window with the 'Action' tab selected. It contains several configuration options and buttons for managing the system.

| Configuration | Settings | Action |
|---------------------------|----------|-------------------------------|
| Alarm On Entry: | Off | ▼ |
| Alarm On Exit: | Off | ▼ |
| Note: | | Edit Note |
| Picture of parking area: | | Load Picture |
| Sensor State History: | | Show Sensor State History |
| Accuracy Analysis: | | Show Accuracy Analysis |
| Parking Transaction List: | | Show Parking Transaction List |

6. This brings up a photo of the vehicle. The image is time and date stamped.

A note can be added here to the image if required.

The LPI feature displays all the plates currently in the car park and their location.

The screenshot displays the 'RO Garage - Level 3' interface. On the left, the 'SITE STRUCTURE' panel shows a hierarchy of levels and their occupancy percentages. The main area is titled 'Parking Cars' and contains a table with columns: DateTime, Plate, LPR-Plate, Area, and ID. The table lists various cars with their license plates and current locations. On the right, there are search filters for 'License Plate (full match)', 'License Plate (contains)', 'LPR-Plate (full match)', 'LPR-Plate (contains)', 'Area', and 'Device Id', each with an input field and a search button. Below the table, there are 'Reset' and 'Refresh List' buttons.

| DateTime | Plate | LPR-Plate | Area | ID |

You can also search for plates here as well.

1. In the Car Locator management screen a user can search for a plate. The system stores the plate, a picture of the car, the location, time of entry and time of exit.

The screenshot shows the CAR LOCATOR admin panel. The top navigation bar includes a search bar with the text "and zucchini recipe" and a user profile for "Stephen Evans". The main content area displays "737 spots in River Oaks. 208 occupied. 529 free. 28% occupancy rate." Below this, there are search filters for "Occupied" and "Free" status, and a search bar for a number plate "JPR0990". The main list shows five cars with their respective details:

| Level | Plate | ICOM1.COM | Timestamp | Car photo |
|------------|----------|----------------------|--------------------|-----------|
| Z4 Level 3 | JS8651 | ICOM1.COM_21.MCS_014 | 06.03.2018 - 09:55 | |
| Level | NS8455 | ICOM1.COM_23.MCS_112 | 06.03.2018 - 09:54 | |
| Level | DGF7364 | ICOM1.COM_23.MCS_038 | 06.03.2018 - 09:54 | |
| Level | DS91 | ICOM1.COM_23.MCS_168 | 06.03.2018 - 09:54 | |
| Level | JPG53454 | ICOM1.COM_23.MCS_062 | 06.03.2018 - 09:51 | |

This block shows a detailed view of a car entry. The car is identified by the plate "JPR0990" and is located in "Z5 Level 3". The ICOM1.COM ID is "ICOM1.COM_21.MCS_092" and the timestamp is "06.03.2018 - 08:07". A car photo is shown below the timestamp. Below the car photo is a "Level map photo" showing the car's location on a map. The coordinates on the map are "x 0.1965 y 0.2952".

2. The Car Locator system stores:

- the plate
- a picture of the car
- the location
- time of entry
- time of exit

Searches can be made for cars here. Searches can be made for usage as well. For example, show me cars that parked more than once this month.

TAKING YOU
TO THE
NEXT LEVEL!
