

THE INDECT UPSOLUT SYSTEM  
CAN BE USED TO ASSIST  
CUSTOMERS WHO HAVE LOST  
THEIR CAR. ➔

The customer can enter their license plate number into a smartphone app or a fixed kiosk and quickly locate their car within your garage. This is also optionally available via an interface to your PARCS payment machines.

INDECT can provide fully customized smartphone App (iOS®, Android®, WMP 8®) for your parking garage. The customer simply inputs their license plate number and the app then shows them an image of their car. They click to confirm and the App displays a map showing the location of the car.

Customers will be able to enter their license plate into the dedicated car finder terminal located in the garage. The terminal will be customized to suit the airport design.
