

INDECT DESIGNS AND BUILDS ALL OF OUR OWN PRODUCTS ALLOWING US TO DELIVER FULLY CUSTOMIZED PRODUCTS. ↗

Photos 1 and 2 show a sensor and a Find My Car kiosk that have been customized at Texas Medical Center in Houston.

INDECT can make the sensors in any color. We can also add your logo or other images to suit your corporate requirements.

All of our signs can be customized to suite your needs. We can provide the signs with specific box colors, LED colors, backlit text, etc. We often work in conjunction with the local wayfinding consultants for the site to ensure the signs enhance the existing wayfinding concept.

Photo 3 shows signs that were created for Wynn Hotel in Las Vegas. The signs include LED backlit text for extra visibility of the wayfinding text that matched the existing signs in the garage.

Please feel free to discuss how we can deliver something that suits your corporate or site branding.
