

PEOPLE COUNTING

PEOPLE COUNTING UPSOLUT

INDECT OFFERS AN ADD ON SOFTWARE MODULE FOR PEOPLE COUNTING. ↗

This unique feature allows the INDECT sensor to count how many customers arrive and leave in each vehicle. This information is available in reports so you can see peak pedestrian flows from the parking garage.

The People Counter can be expanded to include additional cameras at pedestrian entry and exit points to the garage. This will allow us to report on how many people arrived and where they went.

INDECT offers an add on car pool module for this feature. The Car Pool module is for monitoring dedicated car pool spaces in garages. The system will create an alert if less than 2 people exit a parked vehicle.
